***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 20-35 are rejected for depending upon withdrawn claims.

***Claim Rejections - 35 USC § 102***

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 19 is rejected under 35 U.S.C. 102(b) as being anticipated by WO 8401740 to Rhodes et al.

Re claim 19, Rhodes teaches a manipulator comprising a foot part 24 and a number of members connected to the foot part 24 and to each other respectively, and at least a gripper part 36, such that the members and the gripper 36 constitute, with the foot part 24, an arm 10, wherein drive means, in particular motors 14, for moving at least a number of the members and the gripper 36 are provided in the foot part 24 wherein a first member 28, in particular the upper arm, is rotatable about a shoulder axis relative to the foot part 24 and a second member 32, in particular the lower arm, is rotatable about an elbow axis relative to the first member 28, characterized in that compensating means (see abstract) being provided in the foot part 24 for the first 28 and second member 32 which, upon movement of the members, at least partially compensate for the moment exerted by the first member 28 relative to the foot part 24

and by the second member 32 relative to the elbow axis, the arrangement being such that thus, during use, couples acting on a number of drive means are limited.

**Conclusion**
